1. In the past, (i.e. some decades ago), they would take out the front part of a person's brain in the 'so-called' mental hospitals/asylums of England/Britain.
2. Nowadays, in the 21st century, drugs or chemicals are used not only to incapacitate ~~but~~ etc, but to achieve almost any response <sup>to the</sup> ~~to~~ <sup>man</sup>.
3. ~~With~~ With the right combination of chemicals, an expert in chemical combination, can 'literally' control the masses - at any given point in time - also they think
4. It can be looked at as power hungry and greedy individuals, using biomedical/biochemical
